1. Which statement is correct for CSS styles?
Options

This problem has only one correct answer
- CSS styles in an internal style sheet are stored in a separate file than the HTML code.
- CSS styles in an external style sheet are written in the HTML file in the <head> element using the <style> element.
- An Inline CSS style applies to two or more elements.
- An Inline CSS style applies to one element.

2. Read the code carefully and select the correct option.
<p class="class name" id="id name"> This is a paragraph. </p>

Options

- The code is correct and we can apply CSS using class and id easily.
- Id attribute should be written before the class attribute.
- There will be 2 IDs and 2 classes.
- CSS won't be applied by id because there is an extra space between "id" and "name" in id="id name" but CSS can be applied by 2 classes

3. State whether True or False.
i) Any inline style sheet takes the highest priority.
ii) Any rule defined in style ..../style tag will override rules defined in any external style sheet file.
Options

This problem has only one correct answer
- i-False, ii-False
- i-False, ii-True
- i-True, ii-True
- i:True, ii-False

4. Observe the following html code:
```
<div id ="parent">
   Coding Ninjas
   <div id="child">
        World has enough coders
        <div id="childchild">
            Be a Coding Ninja.
        </div>
   </div>
 </div>
```
The CSS code for #parent is:
```
#parent{
   width: auto;
```

```
    height: 50px;
    background-color: cyan;
    font-size: 50px;
    color: orange;
}
```
Which properties of the #parent 'div' will be inherited by the #child 'div'?
Options
This problem may have one or more correct answers
- width:auto
- height : 50px
- background-color: cyan
- font-size: 50px
- color: orange

5. ***Which is not the selector type of CSS?***
   Options
   This problem has only one correct answer
   Local selector
   Universal selector
   Descendant selector
   Type selector
